Activate a Windows Operating System: Windows 7, Windows 8, Windows 8.1, Server 2008, Server 2008 R2, Server 2012 or Server 2008 R2:

1. Open up an Elevated Command Prompt window. Ie Run Command Prompt as Administrator.

2. In the elevated Command Prompt window, verify that the current directory is **C:\Windows\System32**. If it is not, type

   ```
   CD \Windows\System32
   ```

   and press **Enter**.

3. Type the following command:

   ```
   cscript slmgr.vbs /skms 10.1.1.119
   ```

   and press **Enter**.

   Then type the following command:

   ```
   cscript slmgr.vbs /ato
   ```

   and press **Enter**.

4. Close the Command Prompt window.

And you're done for that installation of Windows on that computer.

Activate Microsoft Office (2010 or 2013)

1. Open an Elevated Command Prompt window. Ie Run Command Prompt as Administrator.

2. Type the following command, depending on your version of Office:

   Office 2010:

   ```
   CD \Program Files\Microsoft Office\Office14
   ```

   Press **Enter**. This assumes you installed Office in the default location.

   > Note: If you installed the 32-bit version of Office on a 64-bit system, use this command instead:

   ```
   CD \Program Files (x86)\Microsoft Office\Office14
   ```

   Office 2013:

   ```
   CD \Program Files\Microsoft Office\Office15
   ```

   Press **Enter**. This assumes you installed Office in the default location.

   Note: If you installed the 32-bit version of Office on a 64-bit system, use this command instead:

   ```
   CD \Program Files (x86)\Microsoft Office\Office15
   ```

3. Type the following command:

   ```
   cscript ospp.vbs /sethst:10.1.1.119
   ```

   and press **Enter**.

4. Type the following command:

   ```
   cscript ospp.vbs /act
   ```

   and press **Enter**.

5. Close the command prompt window.

And you're done for that installation of Office on that computer.
